

Sacred Heart located near the Japanese Garden, Georgian Court University,
Lakewood, NJ

In dealing with this piece of statuary I began with a thorough cleaning using the Proscoco Limestone and Masonry Pre-wash, and Afterwash.

Three of the four freestanding digits were broken off, and missing. Not uncommon since the stone is very fragile when unsupported.

I did the rough carving in the studio, and the fine work after the pieces had been drilled and pinned in place. Attachments were made with stainless steel pins and epoxy.
